Make sure your clients know how to keep their pets safe during cold weather. Share tips, and download this free client handout to use in your practice. Tue, 04 Dec 2018 16:04:00 GMT American Veterinary Medical Association - Home - Onychectomy, popularly known as declawing, is an operation to remove an animal's claws surgically by

means of the amputation of all or part of the distal phalanges, or end bones, of the animal's toes. Because the claw develops from germinal tissue within the third phalanx, amputation of the bone is necessary to fully remove the claw.

Mon, 03 Dec 2018 23:00:00 GMT Onychectomy - Wikipedia -

### INTRODUCTION

Applicants who qualify as small entities as defined by 37 CFR 1.27(a) enjoy a 50% reduction in most government fees. And, in most cases, a small entity applicant remains a small entity throughout the prosecution of an application.
